

Committed to the Chesapeake

IMPROVING THE QUALITY OF THE ENVIRONMENT IN WHICH WE LIVE, ONE PROJECT AT A TIME®

For 46 years, **EA Engineering, Science, and Technology, Inc., PBC (EA)** has been working within the Chesapeake Bay – long recognized as one of America’s greatest environmental treasures.

Utilizing innovative approaches and technologies, EA predicts, evaluates, and mitigates adverse impacts to the Chesapeake Bay watershed – from its northern headwaters in New York to its outlet in the Atlantic Ocean.

Today, EA employees are improving water quality by improving wastewater treatment systems. They are addressing sea level rise by creating living shorelines to reduce erosion and flooding, managing stormwater by applying best management practices to achieve TMDL requirements, and remediating contaminated sites to facilitate their productive reuse.

We are continuing our legacy of developing sustainable solutions for the disposal of the Port of Baltimore’s dredged material. This has included the development of the largest beneficial reuse project in the U.S. – Poplar Island – which serves as habitat for endangered species and an educational facility for children and adults alike.

On all projects, we work with multiple project planners including federal agencies, state and local government, community groups, and local residents.

Leading by example, our employees contribute their time and knowledge to improve the Chesapeake Bay region. They actively participate in local cleanups, environmental education events, and serve in leadership roles for non-profit organizations.

EA[®] Overview

About EA

EA is a 100% employee-owned public benefit corporation that provides environmental, compliance, natural resources, and infrastructure engineering and management solutions to a wide range of government and industrial clients. Headquartered in Hunt Valley, Maryland, EA employs more than 500 professionals through a network of 25 commercial offices across the continental United States, as well as Alaska, Hawaii, and Guam. In business for more than 46 years, EA has earned an outstanding reputation for technical expertise, responsive service, and judicious use of client resources. Ecotoxicology Laboratory

In continuous operation since 1981, EA's ecotoxicology laboratory has conducted more than 32,000 toxicity tests. Nationally certified through NELAC (National Environmental Laboratory Accreditation Conference), the laboratory provides high quality toxicity testing, careful interpretation of data, and appropriate application. The laboratory is housed in a modern, state-of-the-art, 8,000 ft² facility built in 2012.

Sustainability Commitment

As an environmental consulting firm and a public benefit corporation, EA is committed to constantly advancing new ways and methods for putting sustainability into practice and measuring our achievements. On behalf of our clients, we focus on minimizing resource consumption, while maximizing value creation during the execution of our projects.

Safety and Health

EA considers safety and health to be of the highest priority. Our commitment to safety has been consistently recognized by the National Safety Council, which honored the company with its Occupational Excellence Achievement Award in 2018, 2017, 2016, 2014, and 2012; and with its Industry Leader Award in 2014.
