

# Always CHECK before you CLICK!

## Don't help others steal your information.

**TARGETED EMAILS**  
from hackers will look  
legitimate at first glance

Make sure the  
email is **GENUINE**  
before you click  
on any links!

## What To Check For

- 1 Look for unprofessional **spelling or grammar errors**.
- 2 Treat **any email you didn't expect to receive** with suspicion.
- 3 Check for **odd phrases and word choice** based on your knowledge of the sender.
- 4 **Hover over links** to see if the web address is legitimate and relates to the email's content.
- 5 Verify any email that asks for personal information by **independently looking up the sender's contact information**.
